### **Insider Threat Program Development-Management Training Course™**

Has your organization or business considered how damaging an Insider Threat Incident can be? The National Insider Threat Special Interest Group (NITSIG) has compiled some "Eye Opening" [reports, surveys and incidents](#) to show how damaging and costly an "Insider Threat Incident" can be. A first step at mitigating "Insider Threat Risks" in the establishment of an Insider Threat Program (ITP).

#### **Course Overview**

- There are numerous security certifications that attempt to set baseline knowledge and skill standards for positions in Cyber Security, Information Assurance, Information Security, Information Systems Security, IT / Networking Security, etc. **But none of these certifications address the knowledge and core skill-sets an individual needs to develop, manage or support an organizations ITP.**
- This **2 day** training course will ensure the ITP Manager (FSO, CSO, CISO, Etc.), and others who support the ITP (Human Resources, IT, Network Security, Etc.), understand their roles and responsibilities for developing and managing an ITP and ITP Working Group.
- This course will provide students with the training, knowledge and resources to ensure your government agency or business has a robust and effective ITP, that **goes beyond** compliance regulations (National Insider Threat Policy, NISPOM Conforming Change 2).
- This course is also very well suited for any organization or business that is not required to implement an ITP, but is looking to develop or enhance their ITP, or is concerned with Employee Threat Identification and Mitigation.
- This course will present a **greatly magnified view** of the Insider Threat problem, and provide a **proven and comprehensive** Insider Threat Risk Mitigation Framework, for detecting, deterring and preventing Insider Threats.
- This course provides a view of the "Insiders Playbook" of potential breach scenarios, and will demonstrate the many "Insider Threat Risks" that regulations and traditional security approaches fail to mitigate, and will put an organizations assets at risk.
- This course is based off the [Instructors](#) Real World Experience, Methodical Approach and ability to Think Outside The Box as it relates to developing and managing a robust and effective ITP.
